FaceKey™

900 North East Loop 410, Suite D401
San Antonio, TX 78209
210-826-8811
info@facekey.com
www.facekey.com

Headquartered in San Antonio, TX, FaceKey has pioneered and patented a family of biometric products and solutions that utilize face recognition and/or fingerprints for identification since 1999.

PRODUCTS: The product line includes Access Control, Time and Attendance and Muster systems. Details for each product are included.

NEW: This year we are introducing the Shepherd Security System which provides additional functions for more complex installations. In addition to the FaceKey biometric readers, the Shepherd supports HID card readers and certain other readers that integrate via Wiegand. Both access control and time and attendance are supported on this platform.

<div align="center">

Customers want Faster and Better Products and Service – and we have it.

</div>

THE FUTURE: Today's customer has expressed a need for products that provide the highest level of security, fantastic support and the best price. And that is what we do. FaceKey's products are the future. They operate on your network reducing cabling runs and labor costs and provide superior service.

<div align="center">

We like saving our customers time and money.

</div>

FaceKey products offer many ways to save. If the installation is new, less cabling and labor to install is needed. There are savings on cards, keys and re-keying, as none are required. As you grow, new units can expand the system easily. Using the same core software and database of enrolled faces and/or fingerprints for all products reduces costs one more way. Finally, to upgrade your old system, simply replace your card readers with our biometric readers to add security at a low cost.

The FaceKey Integrated Solution

<div align="center">
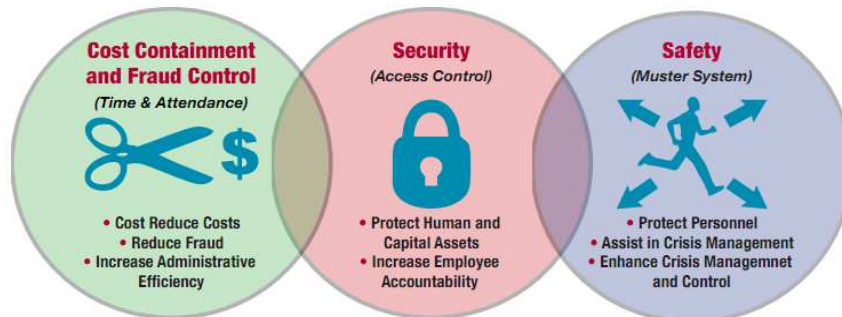

We take pride in our world class service and support.
Customers talk to a real person.

</div>

FaceKey – Security for the 21st Century

The popular security card system invented in the last century cannot provide accurate ID and is far more costly. Imagine all the ways it has been outdated and outsmarted since then. People use other people's cards, they lose their cards and leave their cards at home. You don't know how long a card has been missing before it is reported lost. Errors and buddy punching increases your labor cost.

FaceKey has the solution for the 21st century problems: fingerprint and/or face recognition access control, time and attendance, and muster systems.

FaceKey fingerprint and face recognition security systems are the safer, better, and more cost-effective alternative to outdated card systems.

EntryGuard™ System

The EntryGuard™ System provides true ID. The system utilizes fingerprint and/or face recognition readers.

The system is composed of the EntryGuard Door Management Software and the FaceKey biometric readers.

EntryGuard™ is an integrated system with access control, time and attendance, and muster systems.
Shepherd System

The Shepherd System utilizes a one, two, and four door controller. In addition to the functions offered by the EntryGuard System, the Shepherd System offers a variety of nonstandard functions for specific applications. The system operates as a module to the EntryGuard System or as a standalone system.

The System supports a selection of readers: FaceKey face and fingerprint readers, HID, EM proximity, and Mifare from a variety of manufacturers.

FaceKey Door Management Systems

Common features:

o Linux operating system.
o Mac address.
o Keypad illuminates.
o Build in door relay, to control electric locks and relays.
o Tamper switch.
o Wiegand output.
o Door sensor input.
o Alarm output.
o DLST, (Day Light Savings Time), Except AC-300
o Communications TCP/IP, RS232, RS485.
o Duress fingerprint.
o 5 Groups (assign user to one group).
o 50 Time zones for periods of the day to grant access.
o 10 unlock combinations – allow 1 to 5 users to grant access.
o Two and three factor verification.
o High resolution fingerprint reader.
o High fingerprint capacity (dependent on model: 1500 to 8,000 templates).
o Doorbell button (except for AC-07, AC-300 and FKFP-AC-OS models).
o Self-Test (diagnostics tool).
o Operates as a standalone device.
o Admin privilege for access to onboard menus.

FaceKey Readers

(SPO) = special order. (S) = Standard

Model	Capacity	Additional Options	Application
AC-D6 **Keypad lights up Three Factor ID**	**Fingerprint Capacity** 30000 FP templates (S)	• Basic fingerprint door controller • Power management • Supports Generic, (EM), HID and Mifare Card reader • 2" Color, TFT Screen (220x176) • Multiple Languages (English, Spanish & others) • Up to 15 multi-identification methods to enhance security levels • Audio-Visual indications for acceptance and rejection of fingerprints • Aux input with enhanced flexibility to link with wired detector or switch • Compatible with new Shepherd Door Management System software. • **DLST** function.	For retrofit solutions, connects to access control panels of third party products. MusterGuard™ Station Controls: Single door. Machines. Equipment. Elevators. Gates. Attendance.

Model	Capacity	Additional Options	Application
AC-300 Fingerprint & card only	**Fingerprint Capacity** 1500 FP templates (S) **Card Capacity** 10,000 Outdoor IP65 rated Stainless Steel case	• Optical fingerprint reader. • Optional external USB keypad. • Outdoor IP65 rating. • Accommodates strikes or mag locks. • Audio-Visual indicator for acceptance and rejection of fingerprints. • Aux input to link with wired detector or switch. • Duress alarm offers protection for emergencies. • Tamper-proof switch and multiple alarm outputs. • Access privilege management. • Linux environment to prevent hackers. • All access control privileges require the EntryGuard or Shepherd DMS. • Anti-Pass back. • **No DLST** function (Time controlled by DMS software).	For retrofit solutions, connects to access control panels of third party product. Controls: Single doors. Machines. Equipment. Elevators. Gates. Attendance.
AC-65 **Three Factor ID 2.5 inches wide.**	**Fingerprint Capacity** 2200 FP templates (S) Expandable to 8000 FP templates (SPO)	• Waterproof (IP65 rating) • Small footprint • Supports RFID card reader (Generic & Mifare) • Wiegand input/output • Power management • Cover for fingerprint reader Note: Recommended for outdoor installations.	For retrofit solutions, connects to access control panels of third party products. MusterGuard™ Station Controls: Single door. Machines. Equipment. Elevators. Gates. Attendance.
AC-07 **Three Factor ID**	**Fingerprint Capacity** 8000 FP templates (SPO)	• TFT display • 8 programmable function keys • Schedule bell • Holiday schedule • Egress/ingress control • Wiegand input • Anti-pass-back • SMS (public/individual) • Audio output (schedule bell) • USB port (2) • Supports RFID card reader (Generic, HID compatible with HID card format H10301 26 bit & Mifare card types) • Anti-pass-back • WIFI and GPRS option (available) • Wiegand Input/Output	For retrofit solutions, connects to access control panels of third party product. MusterGuard™ System Controls: Single doors. Machines. Equipment. Elevators. Gates. Attendance.

Model	Capacity	Additional Options	Application
FKFP-AC-OS **Recognition in near darkness Three Factor ID (OS = Limited Outside use)**	**Face Capacity** 1500 1:N (S) (SPO) 3000 1:1 **Fingerprint Capacity** 2000 FP templates (S) Up to 5000 FP templates (SPO)	• TFT Touch Screen • FKFP is simple access 24/7. • Virtual keyboard and keypad • 6 programmable function keys • Schedule bell • SMS (public/individual) • Audio output (schedule bell) • USB port (2) • Infrared/Video camera • Supports RFID card reader (Generic, HID compatible with HID card format H10301 26 bit & Mifare card types) • WIFI and GPRS option (available) • Built in battery backup (optional) • Wiegand Output • Full Access management function • 50 time zones • 10 unlock combination • Anti-pass-back	For retrofit solutions, connects to access control panels of third-party product. Controls: Single doors. Machines. Equipment. Elevators. Gates. Attendance.
FKFP-PRO **Recognition in near darkness Three Factor ID**	**Face Capacity** 1500 1:N (S) 3000 1:1 (SPO) **Fingerprint Capacity** 2000 FP templates (S) 5000 FP templates (SPO)	• TFT Touch Screen • Virtual keyboard and keypad • 6 programmable function keys • Wiegand Input/Output • Schedule bell • SMS (public/individual • USB port • Networkable (TCP/IP, RS232, RS485) • Supports RFID card reader (Generic, HID compatible with HID card format H10301 26 bit & Mifare card types) • Anti-pass-back • Egress/ingress control (open/lock door) • Holiday scheduling • WIFI (option) Note: Outdoor usage not recommended.	Connect to Access control panels of third party product. Controls: Single doors. Machines. Equipment. Elevators. Gates. Attendance.
FKFP-PRO2	**Face Capacity** 1: many Faces 1500 Fingerprints 2000 (SPO) 1:1 4000 Faces & Fingerprints	• TFT display • 4 programmable function keys • Holiday schedule • Anti-pass-back • USB port • Supports RFID card reader (Generic or Mifare) • Anti-pass-back • Wiegand Input/Output • Acknowledgment of acceptance: LED indicator, display indication and voice reply. • Auxiliary input. • Flip cover to reduce background lighting for fingerprint reader. • Face auto correction contrast & brightness. • Keypad (Lighted)	For retrofit solutions, connects to access control panels of third party product. Controls: Single doors. Machines. Equipment. Elevators. Gates. Attendance. Note: Outdoor usage not recommended.

Accessory			
Model	**Capacity**	**Additional Options**	**Application**
Desktop Fingerprint Enrollment Reader		• Enrollment reader, connects to USB port on PC (USB 1.0 or 2.0)	Works with EntryGuard™ Version 2.4.4 and Shepherd Door Management Software
POE Adapter		• POE Adapter +12VDC @1.17A • POE Adapter +12VDC @1.75A • POE Adapter +5VDC @ 2.20A	Needed to convert POE power 36 to 56 VDC to operating voltage for time clocks and Door management hardware.
SRB Security Relay Box		• Security Relay Box enhances door security for outside or inside doors • Security connection using the Wiegand output from one of the EntryGuard™ Face or fingerprint products • Shepherd Security Software required.	

.

Notes: 1. For outdoor installations in direct rain or sun light, we recommend an EntryGuard™ Bonnet for protection (exceptions: the AC-65 device does not require protection and units with facial recognition not recommended for outdoor use). See picture below of bonnet.

2. For extreme weather conditions, FaceKey™ can design an enclosure to meet your specifications and requirements. The AC-07, FKFP-AC-OS and FKFP-PRO devices have TFT displays, subject to sun light damage. The optical fingerprint reader should be shaded from direct sunlight to prevent reduced readability of the fingerprint.

3. FKFP-AC-OS is now available via special order with a new enhance camera. Call FaceKey, 210-826-8811 for more information.

Optional: Bonnet

EntryGuard™ Time Clocks

Model	Capacity	Options	Application	Comments
Basic time clock TA-D6	**Fingerprint Capacity** 3000 FP templates (S)	• Schedule bell • 2.8-inch color touch screen • Virtual Keypad • Multiple languages (English, Spanish & others). • Optical fingerprint reader. • Communications: • TCP/IP • RS485 • USB port • DLST • Supports RFID card reader (Generic, HID & Mifare card types) • Audio-Visual indications for acceptance and rejection of fingerprints.	Time Clock School Attendance	+12 VDC power supply included. POE splitter available. Requires Shepherd Security software Inline battery backup module.
Ultimate Time Clock TA-03	**Fingerprint Capacity** 8000 FP templates (S) 200,0000 Events	• Schedule bell • Alphanumeric keypad (T9) • Keypad lights • Programmable function Keys • Work code w/ work code list. • 3" TFT (SVGA) display • Programmable Screen savers • Self-inquiry (user can see is Clock-in/out times • Communication: TCP/IP, RS232 & RS485 • USB port (two ports) • Enhanced Fingerprint shows the position of finger placement. • Supports RFID card reader (Generic, HID compatible with HID card format H10301 26 bit & Mifare card types) • WIFI (Wireless) module (optional)	Time Clock Work code collection clock Records keeper School Attendance	+12 VDC power Supply included. POE s plitter available. Requires T&A Software. Inline battery backup module.
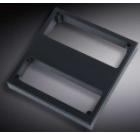

Model	Capacity	Options	Application	Comments

RD1000E **Generic Card reader, Long distance up to 60CM (23")**	26 bit Wiegand output 12VDC Beeper IP 65 rated		Read a Generic, (EM) format card up to a distance of 60CM (23")

FaceKey™

Three Factor ID Available!
Networkable & Addressable

FaceKey's™ EntryGuard™ AC-D6 can be programmed to open a door with the touch of only a fingerprint, or only a PIN code or only a card; yet can deliver three factor identification if required. Panels are not required.

When a new worker is added to the system, the AC-D6 encrypts and securely stores each fingerprint's data into a database. The AC-D6 may be networked with the FaceKey™ Access Control Management Software (sold separately) or it can be deployed as a standalone unit without the software. The AC-D6 units have the capacity of 3000 fingerprints and can store up to 30,000 events.

The EntryGuard™ AC-D6 has a full array of attributes (see Benefits and Features and Technical Specifications) including an extensive number of time zones to control access and alarm functions which increase a facility's security and safety. For installations where access requires the identification of more than one person, the unlock combo feature will allow the system to request the fingerprints of up to five persons to grant access.

Utilizing the FaceKey™ Access Control Management Software creates a typical IP network server and client configuration, which is easy to install, operate and requires minimal training. Data collected at each door unit is automatically uploaded to the server when software is in real time monitoring mode, while data or configurations made at the network level (such as the addition or deletion of a user) may be selectively distributed to each door unit.

The EntryGuard™ AC-D6 is compatible with FaceKey's EntryGuard™ and Shepherd Hybrid management software.

FaceKey™ Corporation
900 NE Loop 410, Suite D401
San Antonio, TX 78209
210-826-8811
www.facekey.com
Email: info@facekey.com

Benefits and Features:
- Easy to install
- English language (other languages available)
- Equipped with optical fingerprint reader and keypad (variety of card readers – special order)
- Keypad numbers illuminate
- Accommodates electronic door strikes or magnetic locks
- 14 multi-identification methods allow user individual requirements.
- Acknowledgment of acceptance: LED indicator, display indication and audible reply
- Secured communication between FP reader and controller
- Wiegand Output, Input & SRB
- Standalone or with EntryGuard™ or Shepherd Hybrid Management Software
- Generic, Mifare or HID (format H10301 125KHz 26-bit) proximity card readers (Optional)
- Doorbell switch
- DLST
- Antipassback

Technical Specifications:
•	Connectivity:	TCP/IP, RS232, RS485
•	Fingerprint Capacity:	3000
•	Card Capacity:	5000
•	Transaction Storage:	30,000
•	Identification Time:	<=1s
•	FAR:	<=0.0001%
•	FRR:	<=1%
•	No. Time Zones:	50
•	No. Groups:	5
•	Unlock Combos:	10
•	Alarm Functions:	-If forcefully removed
		-Door forced open
		-Duress fingerprint
		-Door exceeds time programmed open
•	Open Door Sensor:	Programmable in a range from 3 seconds to 10 minutes
•	Exit Door Request:	Standard "Exit Request Switch" (Normally Open Switch)
•	Door Unlock Relay:	3 amp, 12 VDC
•	Power Supply:	12 VDC at 400MA
•	Dimensions:	7.2(L) X 3.15 (W) X 1.78 (H) inches
•	Temperature Range:	32°-113°F (0°-45°C)
•	Humidity Range:	20%-80%

Revised 11/27/2018

Fingerprints for Keyless Entry
Networkable & Addressable

With the EntryGuard™ AC-300, FaceKey™ has made access control easier, more economical and secure for clients. The reader can be programmed to open a door with a fingerprint only or in combo with an embedded Mifare card reader. Incased in a metal case, the unit carries the IP65 rating. Wiegand input connectivity is available as an option.

When a new worker is added to the access control system, the FaceKey security system encrypts each fingerprint and stores it into a database. The AC-300 may be networked with the FaceKey's™ EntryGuard DMS Software or the Shepherd Door Management Software, which is sold separately, or deployed as a standalone unit without management software. Additional units of the AC-300 can be added as a business expands its operations.

The AC-300 is a cost effective biometric solution as a primary access control system or to retrofit an existing access control system. The AC-300 supplies a Wiegand 26-bit signal, which allows the addition of a reader to a third-party security platform where a biometric device is required.

Recognition occurs at the AC-300 (door). The FaceKey™ EntryGuard or Shepherd Software creates a typical IP network server and client configuration which is easy to install and operate. Data collected at the AC-300 is automatically uploaded to the server, while data or configurations made at the network level, such as the addition or deletion of a user, may be selectively distributed to each door unit. In the event that communication with the network fails, the AC-300 will continue to operate and collect data, up to 100,000 events, which will be uploaded when communication with the server is reestablished.

The AC-300 has a full array of features (see Benefits and Features and Technical Specifications) and offers an extensive choice of time zones and alarm functions. For installations where access requires the identification of more than one person, the unlock combo feature will allow the system to request the fingerprints of up to five persons, one from each group, before access is granted.

7-12-2016

Benefits and Features:

- Optical fingerprint reader.
- Optional external USB keypad.
- Outdoor IP65 rating.
- Accommodates strikes or mag locks.
- Audio-Visual indicator for acceptance and rejection of fingerprints.
- Aux input to link with wired detector or switch.
- Duress alarm offers protection for emergencies.
- Tamper-proof switch and multiple alarm outputs.
- Access privilege management.
- Linux environment to prevent hackers.
- All access control privileges require the EntryGuard or Shepherd DMS.
- Anti-Passback.

Technical Specifications:

- Connectivity: TCP/IP, RS485. Wiegand 26 (Optional Wiegand input).
- Transaction Storage: 100,000 activities.
- Fingerprint Capacity 1500.
- Mifare Card 10,000.
- Identification Time: <=1s.
- FAR: <=0.0001%.
- FRR: <=1%.
- Time Zones: 50.
- Groups: 5.
- Unlock Combos: 10.
- Alarm Functions: -If forcefully removed. -Door forced open. -Duress fingerprint. -Door exceeds time.
- Open Door Sensor: Programmable in range of 3 seconds to 10 minutes
- Exit Door Request: Standard exit request switch (Normally open switch).
- Door Unlock Relay: 3 amp, 12 VDC.
- Power: 12 VDC at 250MA.
- Dimensions: 5.8(L) X 2.8(W) X1.4(D) in.
- Temperature Range: 14°-140°F (-10°-60°C).
- Humidity Range: 10%-90%.

Fingerprint/cards Capacity	Model #	Part #
1500/10,000	AC-03 MF	8033150

True Outside capability for Fingerprint Access Control

FaceKey's EntryGuard™ AC-65 fingerprint reader is IP based, designed to be a true outside reader (IP-65 rating). The AC-65 fingerprint reader has a built in cover to protect the surface of the reader and to help shade the fingerprint reader from direct sunlight when the finger is placed on the reader for authentication.

The FaceKey™ EntryGuard ™Management Software used to manager the AC-65 creates a typical IP network server and client configuration which is easy to install and operate. Data collected at each door unit is automatically uploaded to the server, while data or configurations made at the network level, such as the addition or deletion of a user, may be selectively distributed to each door unit. In the event that communication with the network fails, the AC-65s will continue to operate and collect data which will be uploaded when communication with the server is reestablished.

High Capacity Feature
The AC-65 access control terminal can be expanded to 8,000 fingerprint templates. The standard fingerprint template is 3, 000. The AC-65 supports RF cards, Generic (EM format) and Mifare smart cards. The capacity of the AC-65 can be increased up to 50,000 users when the fingerprint and ID number are stored on the Mifare card. In turn, the owner of the Mifare smart card presents the card and touches the fingerprint reader to confirm their identity.   While the AC-65 supports several card readers, the unit does not require a card.

Applications
The EntryGuard™ AC-65 lends itself to a variety of applications. For example: Homes, shops, garage, factory, Warehouses, and more.

Expandability
The AC-65 devices can be mixed with other EntryGuard™ family of access control product, for a complete customized total access control solution.

The Linux OS offers more flexibility for integrators to develop new and custom applications and features. FaceKey's SDK package is available so developers can incorporate FaceKey products into other applications.

FaceKey™ Corporation
900 NE Loop 410, Suite D401
San Antonio, TX 78209

Benefits and Features:
- O/S Linux
- Equipped with optical fingerprint reader and keypad
- Up to three factor to identify user:
  - ◊ Fingerprint only   ◊ Card only
  - ◊ ID No. + Fingerprint ◊ ID only (PIN)
  - ◊ Card+Fingerprint   ◊ Card + FP+ Password
  - ◊ Card + Password   ◊ ID No. + Card
  - ◊ ID No. + Card + Password
- 3X5 Keypad and Door Bell Key.
- Acknowledgment of acceptance: LED indicator, display indication and buzzer reply
- Centralized enrollment available with management software.
- Database: Access, SQL and others available with FaceKey™ Management Software package
- Day light savings time
- Supports Generic (EM format) and Mifare RF cards
- Wiegand input and output
- TCP/IP and RS485 communications
- Small footprint to attach to metal door frames 1½ inch wide.

Technical Specifications:
- Connectivity: TCP/IP, RS232 & USB host
- Fingerprint Capacity   3,000 (up to 8,000)
- Card Capacity   10,000 (up to 50,000)
- Transaction Storage: 30,000 activities
- Identification Time: <=1s
- FAR: <=0.0001%
- FRR: <=1%
- Power: 12VDC
- Dimensions: (h)7.5 X (w)2.5 X (d)1.75
- Temperature Range: -4° to 122°F (-20°to 50°C)
- Humidity Range: 20%-80%
- Ingress Protection Level   IP65

AC-65+EM	8033133
AC65+MIF	8033134

FaceKey's™ EntryGuard™ AC-07 provides two new features to make access control easier and more secure for its clients: egress control, (lock and open door schedule) and holiday scheduling. The AC-07 can be programmed to open a door with the touch of only a fingerprint or only a PIN code or only a card, yet can deliver three factor identification as required.

When a new worker is added to the system, the AC-07 encrypts and securely stores each fingerprint's data into a database. The AC-07 may be networked with the FaceKey™ Access Control Management Software (sold separately) or it can be deployed as a standalone unit without the software. The AC-07 units have the capacity of 8000 fingerprints and can store up to 200,000 events.

The EntryGuard™ AC-07 has a full array of attributes (see Benefits and Features and Technical Specifications) including an extensive number of time zones to control access and alarm functions which increase a facility's security and safety. For installations where access requires the identification of more than one person, the unlock combo feature will allow the system to request the fingerprints of up to five persons to grant access.

Utilizing the FaceKey™ Access Control Management Software creates a typical IP network server and client configuration, which is easy to install, operate and requires minimal training. Data collected at each door unit is automatically uploaded to the server, while data or configurations made at the network level (such as the addition or deletion of a user) may be selectively distributed to each door unit.

The unit provides a short message system for public or individual messages.

The FaceKey™ Access Control Management Software supports an unlimited number of EntryGuard™ units using TCP/IP protocol (254 units using RS232/485connectivity protocols).

Benefits and Features:
- Easy installation
- Easy operation
- Connects directly to the local area network
- Equipped with high resolution fingerprint reader
- Alphanumeric keypad (T9)
- HID, generic or Mifare card reader available
- Acknowledgment of acceptance: LED indicator, display indication and voice reply
- Short message system (SMS), public or individual.
- 14 multi-identification methods
- Embedded LINUX O/S
- 3.5" SVGA TFT display
- 8 programmable function keys
- Access Control privilege management
    - Built in door relay
    - Alarm output
    - Door sensor input
    - Request Exit input
    - Unlock combinations (up to 2-5 people)
- Multi-language support
- Built in self test
- Egress programming (close and open door)
- Holiday scheduling
- Duress fingerprint
- USB port (2)
- Daylight savings time
- POE splitter (optional)

FaceKey™

Your Face is your Key
Access Control or
Time Clock Version Available

Face Mode

Fingerprint Mode

Users of the EntryGuard™ Face & Fingerprint Professional Station (PRO) can clock in/out at work or access the facilities.

Three Factor ID is Available: The design permits the PRO to operate in one, two or three factor mode. The PRO has five ID methods which affords 19 ID combinations. The ID methods are: face, fingerprint, PIN, password or card reader. The ID methods can be presented in any order.

The FaceKey™ Face & Fingerprint Professional Station can function as a standalone device or multiple units can be connected over a network. Each unit is TCP/IP addressable and has a unique MAC address visible on the internet.

The FKFP-AC-PRO when used for access control is a full featured access control device; see "Benefits and Features". The EntryGuard™ FKFP PRO unit is available with a RFID card reader (HID card format H10301 26 bit, Generic or Mifare). The PRO when used as a time clock has the same features except the unit does not unlock doors.

 Software: The FaceKey™ Management Software automatically synchronizes all FaceKey EntryGuard™ devices with the network and manages the face and fingerprint templates. If the network fails, the units will continue to operate and collect data which will be uploaded when communication with the network is reestablished. The EntryGuard™ Time and Attendance Management Software provides business rules and reports for time and attendance.

Scalable: The FaceKey™ Management Software database supports an unlimited number of devices and users. Each Standard Face & Fingerprint Station can accommodate up to 2,000 fingerprint templates and 1500 1: many and 3,000 1:1 face templates.   Call FaceKey for units with additional templates.

FaceKey's EntryGuard™ Security Relay Box (SRB) is a cost effective single door controller to enhance access control in a simple and secure way.

The SRB is used in conjunction with the AC-200, AC-300, AC-SF3, AC-65, and FKFP-OS devices. The SRB is a secure door controller that provides an encrypted Wiegand communication output to open an electric lock. The SRB is recommended for installations where the customer asks that the controller be on the inside as opposed to the outside of the door. SRB requires 12 VDC power which is provided by EntryGuard™ product.

The EntryGuard™ SRB is 1.9" X1.5" X 0.6" with two tabs for an easy connection to ceiling or wall.

An exit request input is provided for connecting an exit request button or a Motion detector. The SRB has 2 LEDs for status, red and green.

The SRB receives an encrypted Wiegand signal from the EntryGuard™ Access control terminal to control the electric lock, hence providing high security and safety for outside/inside doors.

FaceKey™

Customers who deploy the EntryGuard™ Time and Attendance System will realize a significant return on investment as the system eliminates "buddy punching" which is possible with traditional time cards and card systems. By using the fingerprint reader, a business can accurately verify when each worker clocked into or out.

In a company where 100 employees make $15 per hour, a daily loss of 10 minutes per worker can total up annually to $165,000. While, it is difficult to measure the productivity of workers, the accuracy of the System can make it easier to reward those employees who meet their work requirements professionally.

The System can be networked to interconnect multiple time clocks or sites. Each time clock is TCP/IP addressable. The FaceKey™ Time and Attendance Management Software supports an unlimited number of time clocks. If the network is down, the time clocks will operate and collect data, uploading the data when communication with the server is reestablished. The Time and Attendance Management Software automatically synchronizes all time clocks with the network. The unit can also work in standalone mode.

The EntryGuard™ Time and Attendance System can be configured to identify authorized users by their fingerprint only, fingerprint plus PIN code or card or PIN code only or card only. While each TA-03 clock has a capacity of 8000 fingerprints, the number of users in the system is not limited.

The EntryGuard™ Time and Attendance Software has a full array of business rules to enable a company to automate the most complex schedules, create shift schedules, implement job codes, check overtime or grant a grace period for a worker who had an accident on the way into work.

The System runs on the existing network. Because each touch of the fingerprint is recorded in the database, reports can be customized. The EntryGuard™ Time and Attendance System works with the major payroll companies for easy transfer of data. The TA-03 clock can be ordered with optional WIFI to go wireless.

Waterproof Mobile Reader
A variety of models are available.

FaceKey's EntryGuard™ mobile reader identifies the user and records who, when and where the reader is used. The TA-HH is a unique portable fingerprint attendance terminal with a rubber coating. The unit is waterproof and dustproof with efficacy rated at the IP65 protection grade. The TA-HH is shockproof up to one meter above the ground, if dropped. The unit has a handle at the top.

The TA-HH mobile reader with its low power consumption and design delivers long standby and usage time. The unit comes with a long life lithium-ion battery.

High Capacity Feature
The standard fingerprint capacity of the unit is 5,000 and can be ordered with a capacity of 10,000 templates. The TA-HH is available with generic or Mifare card readers.

Applications
The EntryGuard™ mobile TA-HH lends itself to a variety of applications. For example: time and attendance systems, mustering drills or custom applications.

The mobile device is convenient for attendance in industries such as construction, mining and agriculture.

Compatibility:
The fingerprints enrolled by the TA-HH fingerprint reader can be shared with other EntryGuard ™ devices. The mobile models are network based and utilize the same software common to the entire EntryGuard™ family of products.

Expandability
The Linux OS offers more flexibility for integrators to develop new and custom applications and features.

FaceKey has two versions of Management Software:

- **EntryGuard™ Door Management System Software**
- **Shepherd Security System Software**

**EntryGuard™ Door Management System Software** (DMS) allows administrators to manage:
1. EntryGuard™ products
2. Users/Employees
3. Access Privileges:
a. TimeZones (up to 50 Time Zones).
b. Groups (up to 5 Groups).
c. Unlock-combinations (two to five people to open a door).
d. Assign multiple factor identification for a group or by user (FP only, Face only, FP&Face, FP&RF, etc.) up to 20 different combinations.

4. Upload and download: Users and access privileges to EntryGuard™ Door Management System products.
5. Real time monitoring.
6. Administrator privilege settings for managers.

User information & Maintenance

Administrator can:

1. Add or delete users and user privileges.
2. Edit user information.
3. Enroll Fingerprints:
   a. Enroll up to 10 fingers.

b. Select a finger to be duress FP.

4. Send user information to all or selected devices.
5. View user information stored in device.
6. Download as needed.

FaceKey Corporation ♦ PH: 210.826.8811 ♦ info@facekey.com ♦ www.facekey.com

EntryGuard™ Door Management System Software

**Search, Report and Export Functions**

- Search by date and time periods.

- Arrange columns by ascending or descending order. Use customer filters to narrow search.

- Export and create a report in 15 formats for easy emailing and updating information to weekly, monthly and yearly reports.

- View status of door usage quickly and accurately.

The user friendly report generator can create custom reports in 15 formats.

The reports can be saved, recalled and updated with new search data.

The reports can be emailed.
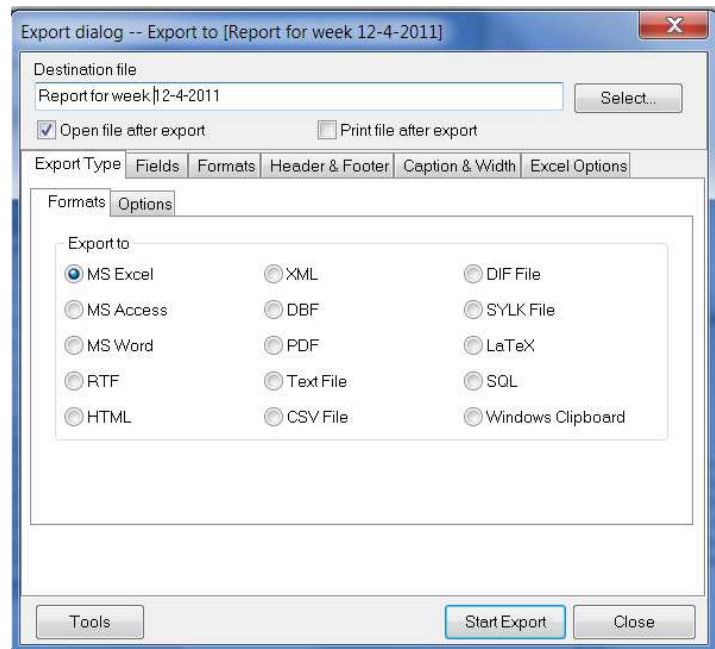

**Shepherd Security System Software – Overview**

The Shepherd Security System includes both access control and time and attendance on the same platform.

The Shepherd Security System Software is multi-functional and expands the flexibility of the system:

• Performs all functions of the EntryGuard™ Door Management System Software.

• The EntryGuard readers can be used. Card readers can be used.

• The software can operate as a simple or complex system.

▪ For complex installations a small controller for 1, 2 and 4 doors is available. For example, the front door is locked until the first person arrives and opens the door. Used to lockdown all doors.

▪ A card reader can be attached to the board.

▪ Card readers and biometric readers can be mixed in a single installation.

Time and Attendance Module
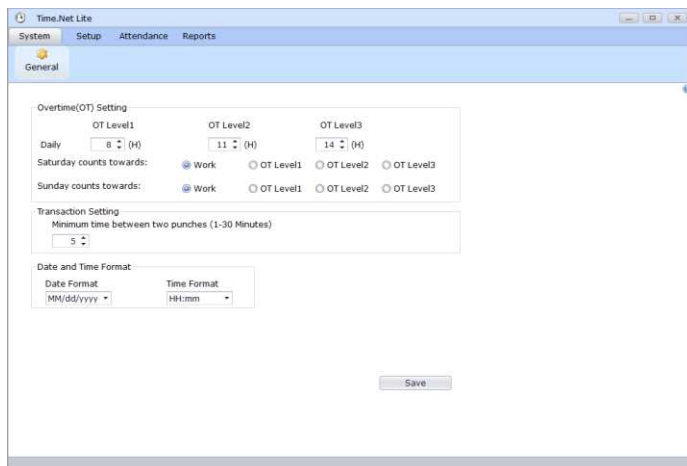

The Time and Attendance Module allows the payroll department, supervisors, and HR to see employees' time from the EntryGuard™ Time Clock(s).

The software calculates the hours the employee(s) has worked. Data then can be electronically exported for import into the payroll system.

FaceKey has successfully imported employee time into Paylocity, Business online, Mas200, ADP, and Incode systems.

FaceKey can develop the import format file to be imported into other online payroll companies using the online payroll system's import function.

The Shepherd Time and Attendance Module uses a graphic calendar to assign and create schedules/shifts for employees and make corrections. It allows HR to set rounding rules. All work time is calculated in hours and minutes. There are predefined reports with all the data required for payroll. This user-friendly software allows HR to setup shifts, assign employees and calculate the employee time in less steps then our old version.

The Time and Attendance Module also tracks sick time, vacation taken, and other leave classes that HR creates.

MusterGuard™ Software

The MusterGuard™ system provides an electronic roll call that allows the administrator to give first responders a report of any persons that have not checked into a Muster station (i.e. a missing person report).

The MusterGuard System in addition, shows who is on site. The MusterGuard™ System uses FaceKey hardware and network software to manage all personnel, from enrollment of employees and guests to generating reports for first responders.
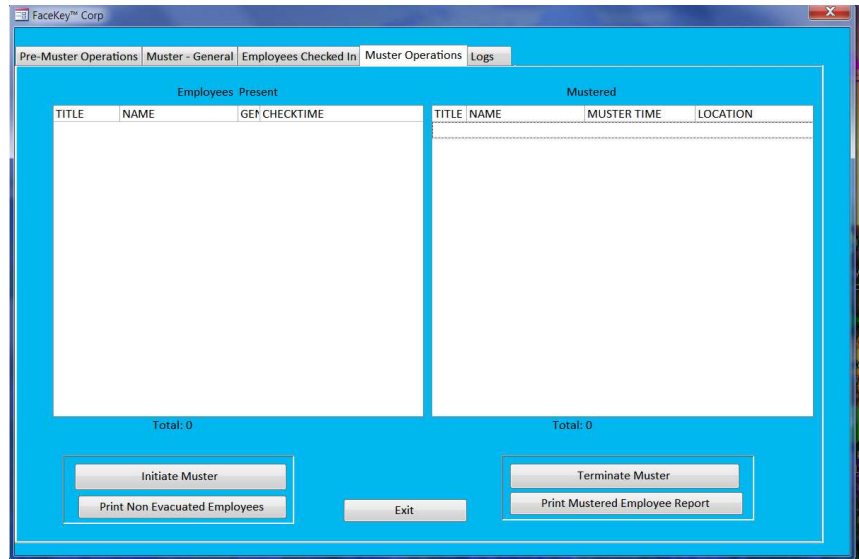

FaceKey develops custom systems to meet the client's needs.

The MusterGuard™ System is shipped fully assembled with the software installed and tested. The system includes a server, a monitoring PC, muster stations, checkin/out stations (at least 3 units).

Lyssy and Eckel Feed, Poth, TX – Time and Attendance System for several locations.

## Payment Data Systems Inc., San Antonio, TX – Access Control

"While we had a small project (two units), we were made to feel if we had a really large project in terms of the attention we received.

Under a contract between the building management and an integrator, we installed two FKFP-AC-PRO units. We selected these models because of their compact design and high function. Each of the two access points required different security access methods for different groups. To our main office facility, we deployed facial and fingerprint access for our employees and PIN codes for building personnel such as property managers, building security, and janitorial services. For the other sensitive access point fewer personnel were given access. In addition to the security protocol on each access point, each group was further restricted or allowed access to a particular access point which was based on the day of week and time of day". Michael Long- CEO Payment Data Systems Inc.

The Champion Group, San Antonio, TX – Access Control for facilities, server and file rooms.
