

Meridian Care Selects FaceKey's Biometric Time & Attendance System

SAN ANTONIO, TX--(MARKET WIRE)--Mar 26, 2009 -- FaceKey Corporation, (Other OTC:[FEKY.PK](#) - [News](#)) the manufacturer of biometric-based security products utilizing fingerprint and/or facial recognition, announced today that Meridian Care, a nursing home, has selected their EntryGuard(TM) fingerprint based time and attendance system for their facilities in San Antonio and Alice, TX.

"FaceKey's fingerprint based time and attendance system is a core component in our ongoing commitment to deliver the excellent care to our patients that we are recognized for," said Ms. Katherine Thurman, Regional Director of Meridian Care.

"Meridian selected FaceKey's biometric time and attendance system with its fingerprint based time clocks as part of its 'Best Practices Program' to ensure that it will continue to provide the high quality care that was recognized with an overall four star rating in US News & World Report," said Dr. Yevgeny B. Levitov, President of FaceKey Corporation. (See <http://www.usnews.com/listings/nursing-homes/tx/675171/quality>) "The FaceKey biometric system provides Meridian a means to automate its payroll information and reduce clerical input. Since labor is one of the major costs of any nursing home, Meridian will benefit from having accurate time records for each employee and accurate reports, all collected with a minimum of clerical time, and without fraud from buddy punching."

Annette H. Starkweather, COO for FaceKey, notes, "FaceKey's biometric based access control and time and attendance system provides its customers with tools to mitigate the effects of the current economy. For a small company with only 100 employees, the loss of even 10 minutes of time per employee every day will result in lost productivity of as much as \$161,000 per year. As the size of the company increases, so does the cost of lost time. Biometric time clocks are one of the tools of technology to minimize exposure to errors and fraud."

As the healthcare industry moves toward HIPPA compliance, FaceKey's fingerprint based products will enable our customers to easily meet the pressing challenge of HIPPA privacy requirements by insuring that only authorized individuals have access to records, medications and other sensitive areas.

About FaceKey Corporation

FaceKey Corporation has built a portfolio of patents related to fingerprint and/or facial recognition. Applications for both home and business include access control, accurate and reliable time and attendance systems, and crisis evacuation (muster) stations. The biometric technologies developed by FaceKey are available for licensing to other companies for integration into products that will provide Genuine ID. The company was

co-founded by Dr. Yevgeny B. Levitov and Annette H. Starkweather in 1999 and is based in San Antonio, Texas. More news will be available in the coming weeks.

The company's defined mission is "Helping Good Businesses Survive during a Bad Economy." FaceKey offers a unique INVESTOR PARTICIPATION PROGRAM, and pays a commission for referrals that result in sales. There are many businesses in areas throughout the country that could benefit from payroll savings during these hard times -- and many individual sellers who could also benefit from the commission income.
