## **FaceKey Files Patent Application for Mobile Biometric Device**

Tuesday October 17, 2006 , 8:00 am ET

SAN ANTONIO--(BUSINESS WIRE)--FaceKey Corporation (OTC:[FEKY.PK](#) - [News](#)), a provider of biometrics technology, fingerprint recognition and face recognition technologies, today announced that it has filed a new patent application, application no.11/548,566, for a mobile biometric device.

The new patent application titled "BIOMETRIC ACCESS CONTROL SYSTEM FOR VENDING MACHINES" covers a biometric based mobile device which can provide access control to many types of vending machines.

"This new patent application confirms our commitment to building FaceKey's intellectual property portfolio," noted Dr. Yevgeny B. Levitov. "FaceKey will continue to increase the value of its intellectual property and will seek out opportunities to apply the power of biometrics, i.e. identification technologies, to various market sectors not specifically related to access control or time and attendance."

### About FaceKey Corporation

FaceKey Corp., headquartered in San Antonio, TX, is a biometrics technology provider whose mission is to provide supreme security and accountability products for their customers by utilizing patented and proprietary biometric technologies that identify authorized persons. The company's products reduce costs to business and government, deter identity theft, and prevent unauthorized access to facilities and data. To provide the highest level of security available, FaceKey combines face and fingerprint recognition, reducing fraud and providing better accountability. Because the biometric technologies can identify persons, FaceKey's products are used for a wide variety of applications ranging from securing corporations' confidential areas, providing accountability applications to effectively monitoring time and attendance to greatly reduce employee fraud.
