

FaceKey Supplies Biometric Time & Attendance System for Vista Fibers - October 30, 2007

SAN ANTONIO, TX-- FaceKey Corporation (Other OTC:FEKY.PK - News), the manufacturer of biometric security products utilizing fingerprint and/or facial recognition, announced today that Vista Fibers, a division of Mid America Recycling (the largest independent recycler in the Southwest), has selected EntryGuard(TM) fingerprint-based time and attendance system for its San Antonio location.

John Brubeck, Office Manager of Vista Fibers (www.vistafibers.com), notes, "FaceKey's EntryGuard(TM) system has dramatically reduced the time required to prepare payroll information. FaceKey was extremely supportive during the conversion from paper time cards to the fingerprint-based time and attendance system. Their Technical Staff assisted with the installation, setup and training and continue to be available to help us. Vista Fibers expects to have additional savings because the clocks provide accurate time-in and time-out and eliminate clerical errors and buddy punching."

According to Dr. Yevgeny B. Levitov, President of FaceKey, "Our priority is to produce industry-leading products that provide genuine identification for superior products and save the customer money. We are pleased that Vista Fibers has selected the EntryGuard(TM) time and attendance system and we believe that in less than a year, Vista Fibers will experience sufficient savings to recoup the cost of the system. Vista Fibers has 11 sister locations, and one other location has already purchased a time and attendance system. FaceKey anticipates that as Vista Fibers experiences savings and other benefits, additional locations will purchase the EntryGuard(TM) system. Vista Fibers offers a great service to the community and we are proud that FaceKey is able to provide a cost effective means to help them expand their recycling services."

About FaceKey Corporation

FaceKey Corporation has a portfolio of patents related to fingerprint and/or facial recognition. Applications for both home and business include access control, time and attendance systems, and crisis evacuation (muster) stations. The technologies developed by FaceKey are available for licensing to other companies for integration into their products. Its products are sold through a network of distributors, dealers and system integrators worldwide. The company was co-founded by Dr. Yevgeny B. Levitov and Annette H. Starkweather in 1999 and is based in San Antonio, Texas. Watch for more exciting news.
